DESIGN AND CUSTOMIZATION

DESIGN STAGE

Designing and selecting resin coverings for a commercial structure must satisfy several requirements.

A shopping mall is a structure that includes a supermarket or an hypermarket, surrounded by a range of stores and a food court. In addition to aesthetics and the possibility of customising the environment, the size of the surface to be covered, performance, resistance to foot traffic, frequent washing, sound absorption, waterproofing, slip resistance and hygiene play an important role.

Our structured approach is based on over 40 years of experience in the flooring sector – certified sustainable solutions and the know-how of listening to our customers to always provide the right answer to every need.

ACQUIRED **KNOW-HOW** IS EXPRESSED
IN THE **EFFECTIVENESS**
OF THE PROPOSED **SOLUTIONS**

SAFE AND LASTING CHOICES

FUNCTIONALITY AND DETAILS

Jointless surfaces, resistant to intense pedestrian traffic. In addition to aesthetics and customisation, key features include waterproofing, sound absorption and foot traffic resistance, abrasion and trolley resistance, dust resistance.

EASY MAINTENANCE

With continuous surfaces and resin coatings, maintenance is minimal and cleaning is easier, saving time and money. We suggest professional cleaners for cleaning resin coatings (as PrimaFloor Cleaner®), which help to prolong the life of the floor.

SAFETY

Floors designed to prevent accidents, non-slip, tactile paths for the visually impaired.

GUARANTEES

We are structured to be with the customer every step of the way, from design to delivery, to provide targeted solutions to meet project requirements.

DURABILITY

High levels of UV resistance and color stability for a long service life and low maintenance costs. Long-lasting coatings that resist deterioration and loss of performance.

COMFORT

Integrated solutions to help reduce walking noise. Underfloor heating compatible solutions.

DESIGN

A wide range of floor and wall finishes, effects and colors for any commercial environment, with extensive customisation options.

SHORT INSTALLATION TIME

Very fast installation time, application on existing floors with considerable time and cost savings.

EXPERIENCE

For over 40 years, we have been in charge of the floors of the largest food industry in the country.

SUSTAINABILITY

We use solutions that meet the highest standards of health and well-being. All floor coverings are low emission (VOC free) and meet the stringent parameters of the German AgBB standard.

LEED

The resin system or polyurethane cement coating used includes a LEED® information statement detailing how it can contribute to the building's LEED credits.

OUTDOOR PLAY AREAS

To maintain the quality and efficiency of a shopping centre's flooring at all times, resin coatings are ideal for restyling and renovation projects, thanks to their reduced intervention time and customisable solutions that combine functionality and design for better management and sustainability, benchmarks for the entire property sector.

Approaching a flooring renovation project in a commercial building, or in more or less complex shops, requires a structured partner whose experience and know-how guarantee the result, respect for the project's time and cost, and who also knows how to work with the design studio, the property, the company and all the operators involved.

Efficient flooring makes the environment more comfortable and safer. It contributes to the success of the design.

COMBINE
DESIGN & FUNCTIONALITY

Project: VF Store Milano - Italy

MULTI-LAYER EPOXY SYSTEM

Multi-layer epoxy coatings provide surfaces with sufficient thickness to mitigate the imperfections of the original floor and offer excellent resistance to mechanical and chemical loads. Several layers of resin are applied. Quarz sanding of each layer to ensure perfect adhesion between layers, maintaining anti-slip characteristics and improving mechanical strength. They can also be self-levelling.

PRIMA POLISHING FAST SYSTEM

Prima Polishing Fast System is a rapid polishing system that transforms your flooring into a resistant surface, reflective and easy to clean. The treated floor will not withstand dust, get oils, and grease, etc. stretching over time maintenance works. Furthermore processing times of our treatment are very fast, in just 12 hours we make very large surfaces, immediately available for use.

DECORATIVE SYSTEM

Self-levelling cementitious mortars and pastes are cementitious-based coatings featured with a more textured and natural effect. They consist of special ultra-fast setting hydraulic binders to realize flooring and architectural elements, in thicknesses between 5 and 40 mm. They can be dry sanded, to obtain decorative floor coverings with matt or glossy finish, with natural effect, trowelled, cloudy, Venetian Terrazzo type.

INDOOR GALLERY

DECORATIVE SYSTEMS

Thicknesses from 5-6 mm to 10-15 mm

Decorative versatility, technical characteristics unchanged over time and minimal maintenance are some of the key requirements for the main reception area.

The floor covering reflects the spirit and identity of the entire facility and, through the combination of colours and design, helps to reinforce the concept that has been designed. As these are high-traffic areas, flooring solutions need to be durable, easy to clean and maintain.

Venetian terrazzo floors are a particularly suitable choice for commercial galleries.

FEATURES

- Continuous surfaces
- Resistant to heavy traffic
- Scratch and impact resistant
- Non-slip
- Sound absorbing where required
- Easy to clean and maintain
- Design customisation
- Variable thickness
- VOC free
- Bfl-s1 fire class

FLAGSHIP STORE

In a tailor-made project, i.e. a flagship store designed and built to communicate a brand's identity through the adoption of a precise style and unique design, we work closely with the retail project manager and technical management to create a floor that meets all the project's requirements: from technical performance to choice of colours, final effect (glossy, matt, textured, troweled, cloudy), patterns or sport lines, integration of floor inserts or brand logos.

FEATURES

- Continuous surfaces
- Resistant to heavy traffic
- Scratch and impact resistant
- Non-slip
- Sound absorbing where required
- Easy to clean and maintain
- Design customisation
- Variable thickness
- VOC free
- Bfl-s1 fire class

ACCESSORIES

- Tactile pathways for the visually impaired
- Display stands
- Realization of logos, patterns, sport lines
- Inclusion of floor inserts (marble, decorations)

OTHER PUBLIC SPACES

MULTY-LAYER EPOXY SYSTEM

Thicknesses from 3 to 3.5 mm

Canteens, restaurants and cafeterias are subject to HAC-CP regulations. These are required in all areas where food is handled and served.

Continuous resin floors with no or very few joints are impermeable to grease, oil and water, more resistant to impact and abrasion and, of course, easy to clean and decontaminate.

As these are high-traffic areas, the floors also need to be able to withstand the wear and scratches caused by moving chairs and tables.

Also suitable for public restrooms.

FEATURES

- HACCP
- Non-slip
- Waterproof continuous surfaces
- Resistant to stains from food and liquids
- Resistant to heavy traffic
- Scratch and impact resistant
- Easy to clean and maintain
- Design customization
- Variable thickness
- VOC free
- Bfl-s1 fire class

CONGRESS AREA & EXPO

Conference areas are spaces that host conferences, exhibitions, events and trade shows, and are often found within commercial facilities. The environments need to meet expectations: toilets, rooms of various sizes, bars and checkrooms.

The layout can be sophisticated or functional and minimal. Functional characteristics of the flooring include soundproofing, functionality and durability. Flooring made with self-leveling polyurethane resin systems for improved comfort and sound absorption can be fitted with a rubber granulate mat which is flexible and elastic.

FEATURES

- Reduction of impact sound
- Reduction of vertical sound transmission
- High wearing comfort
- Comfortable to walk on
- Very low VOC
- High level of shock-absorption and impact resistance
- UV resistant
- Flexible, soft and comfortable
- Continuous and jointless flooring
- Wide range of colours to choose
- Attractive aesthetic, smooth finished
- Easy cleaning and maintenance

ACCESSORIES

- Tactile pathways for the visually impaired

PARKING AREA

A parking space is not a must, but it is a worthy strong point for a building. Resin coatings are the most widely used and recommended for this type of surface as the resin itself has resistance, durability, and functionality. Multilayer epoxy or multilayer polyurethane systems can be used. OS8-OS9-OS10-OS11 criteria are satisfied. Colors, flooring, individual parking spaces, and signage can all be highly customized.

FEATURES

- Homogenous, non-slip surface
- Resistant to chemicals, oils, fuels, de-icing salts, lubricants, acids and diluted bases
- Wear-resistant and durable
- Resistant to wheeled vehicle traffic
- Highly customisable
- Underground car park
- These solutions contribute to the building's Leed score

OUTDOOR MALL

For the long lasting eco-friendly redevelopment of outdoor pedestrian or vehicular light areas,

Prima Drain Stone® is an outdoor flooring system totally permeable and environmentally friendly, complies to the hydrological cycle. It is essential to select certified materials that help to improve outdoor areas by ensuring drainage or rainwater filtering and avoiding the creation of new impermeable surfaces (such as asphalt and cement) and/or unstable ones (such as self-locking paving stones and loose gravel).

Composed of natural aggregates mainly from production waste, with different grain sizes, kinds and colors, blended with a special eco-friendly binder.

FEATURES

- Permeable
- Sustainable
- Wide range of natural aggregates
- Customizable for inclusion
- UV resistant
- Head Island Effect
- Frost Resistant
- Short Installation time
- Easy cleaning and maintenance
- Respects the most important Minimum Ecological Criteria
- These solutions contribute to the building's Leed score

OUTDOOR AREAS

PRIMA PLAY®

Prima Play® is an environmentally friendly system with acrylic resin in water dispersion and fillers, developed as a solution for bicycle paths, sidewalks, outdoor multipurpose sports facilities and urban areas.

It is ideal for the restoration and beautification of damaged surfaces, for the protection and coloring of bituminous or cementitious surfaces in environments with heavy pedestrian traffic, for pedestrian and bicycle paths, surfaces in stadiums or sports facilities in general or for urban areas.

Also applicable on worn or new asphalt substrates, provided they are sound and cohesive.

A wide range of colors (NCS) for a valuable esthetic effect and high technical performances, such as good slip resistance, high elasticity and the correct coefficient of restitution (rebound) of the game balls

Prima Play® respects the environment as it is made from VOC certified free products.

FEATURES

- Homogeneous and non-slip surface
- Also applicable on wet ground
- Eco-friendly
- High color stability and UV resistant
- High resistance to atmospheric agents
- High resistance to thermal shock
- Minimal and easy maintenance
